EDUCATION

Media College Viborg

2024 - 2026

I am currently pursuing an HF (Higher Preparatory Exam) degree in web development at Viborg Media College. During GF (Foundation Course), I completed the program and passed the exam, gaining both practical and theoretical knowledge in JavaScript, HTML, CSS, and basic web design (Figma, Photoshop, Illustrator), as well as UX/UI principles. Now, in HF, I am continuing to develop my skills in JavaScript, and we will soon be learning React.

EXPERIENCE

To gain my first hands-on experience, I am looking for a summer internship in June to enhance and solidify the hard skills I have acquired during my college studies. During the internship, I would love to contribute to a team project to strengthen my soft skills and gain experience working with GitHub. I have already worked on several projects during my studies as well as on my own. To get acquainted with my work, you can check out my portfolio or GitHub.
