CERTIFICATE

Web Development
Media College Denmark
Vocational education and training (2024–2026)
Front-end development, UI/UX design.

Full-stack developer
GoIT - 2024
(React, Java Script)

PERSONAL QUALITIES

My approach is performance-oriented and detail focused, with strong attention to clean architecture and usability. I value responsibility, clear communication and delivering results on time. I work confidently both independently and as part of a team.

SKILLS

- React & Next.js — component-driven architecture and scalable, responsive UI development.
- Tailwind CSS, MUI & modern CSS — structured and maintainable styling.
- JavaScript (ES6+) — DOM manipulation, API integration, form handling and interactive components.
- REST API Integration — handling GET/POST requests, processing JSON data and managing asynchronous data flow.
- Express.js, MongoDB & Supabase — backend fundamentals for full-stack collaboration.
- Authentication & JWT — login flows, token handling
- Code Refactoring & Debugging — improving performance, readability and maintainability.
- Git & GitHub — version control, branching, pull requests and collaborative workflow.
- UI/UX & Figma — wireframes and interface design.
- Adobe Creative Cloud — preparation of visual and graphic assets.

EXPERIENCE

Develop modern responsive web interfaces using React, Next.js, JavaScript, Tailwind CSS, Bootstrap, and Material UI.

Build dynamic components and implement functionality according to technical requirements, with a focus on performance, flexibility, and usability.

Work with REST APIs, GET/POST requests, JSON handling, and asynchronous processes. Implement authentication and authorization systems using JWT tokens.

Develop structured and maintainable solutions for both individual and team-based projects, following clean architecture principles and high code quality standards. Additionally, have basic experience with mobile app development using React Native.
Worked with Sanity CMS, including creating content schemas, using GROQ queries, and integrating content into applications built with
Next.js, React, and TypeScript.

As part of a study project, worked on a B2B e-commerce solution based on WordPress and WooCommerce, setting up product catalogs, payment flows, tax configuration, and delivery logic.
Gained understanding of B2B e-commerce and SEO optimization.

Focus on UI/UX design, creating wireframes and prototypes in Figma, as well as working with visual assets in Adobe Creative Cloud.

Frontend Developer Intern – SUPEREGO

- Developed and implemented components using Next.js and TypeScript.
- Worked with Sanity CMS for content management.
- Collaborated on real client projects in a professional development environment.
